NKO User Registration Page

For use by current members of the DoD community ONLY. If you are a guest user, please complete the Guest User Registration process.

NKO will not obtain personally identifying information about you when you visit our site unless you choose to provide such information to NKo. However, you must provide such information in order to register for an account on NKo.

To access this web site, you must first be authenticated as an authorized user. The information you submit below is encrypted and sent to a Department of Defense agency database and matched against up-to-date DoD personnel information.

Privacy Act Statement

Authority: 10 U.S.C. Section 5013, Secretary of the Navy; 10 U.S.C. 5041 Headquarters Marine Corps; 5 U.S.C. 301, Departmental Regulations; 14 U.S.C. 93, Commandant, U.S. Coast Guard General Orders; 10 U.S.C. 8013, Secretary of the Air Force; 10 U.S.C. Section 3013, Secretary of The Army; E.O 9397 (SSN).

Principal Purpose: This information will be used to verify the identity of eligible users of the Navy Knowledge Online (NKO) system.

Routine Uses: Verify/validate eligibility within the Defense Eligibility Enrollment Reporting System (DEERS).

Disclosure: Voluntary. However, failure to provide the requested information may result in the inability to verify eligibility with DEERS to use the NKo system.

Registration Information

Why do we need your Social Security Number?
We request your Social Security number (SSN), date of birth (DOB), and full name during the registration process only to authenticate who you are. The information you provide is compared with your information in the DEERS Database. The information is used solely to verify that you are authorized to have an NKo account. This data is already in the DEERS database and the Secretary of the Navy is authorized to use the data for verification purposes. Your SSN will be stored with your account when it is created, but it is not shared with any other agency or organization, it is not part of your user name, and it is used only as a discriminator during multiple identity instances.

Is it safe?
Security during registration is ensured using a 128-bit Secure Socket Layer (SSL) connection. This is the highest industry standard and establishes an encrypted session between your computer and NKo. We use the same technology other major companies operating on the World Wide Web (WWW) use to protect personal information and guard against identity theft. Look for the little yellow padlock at the bottom of your browser window to ensure you have established a secure connection.

CAC Card authentication
NKo is also implementing a Public Key Infrastructure (PKI) Common Access Card (CAC) verification/validation system, whereby users will also be able to logon using their DoD CAC cards. DEERS verification will remain available for those users who do not possess CAC cards.
